

ALERTPLUS

Virtual Situation Room™ FROM FORUM

<p>Custom-Design --Immediacy --Formfit Firebar Solution</p>	<p>Icons and custom identifiers provide intuitive control. Interface screens assure ease-of-use and ease-of-administration. Versatility, functions and peripherals exceed military requirements for emergency crash or firebar systems. Replaces out-of-support Tellabs 291/292 systems with latest technology; just plug and play. Miniature PC available for work station or control tower installations.</p>
<p>Blast Initiation --Dedicated Red Phone --Dial in with Blast Code --PC Control --Manual Blast Dial</p>	<p>Initiate calls from on-site or off-site to assure immediate connection and response management. Hybrid connectivity via public telephone network (PSTN) and/or ring-down provides thorough coverage in an event escalation. Notify on-campus response team and blast dial to federal or local agencies for additional support. Call out to first responder cell phones.</p>
<p>Digital Solutions</p>	<p>Saves precious seconds and saves lives. Forum Communications is the premier source for First Responder Technology for emergency alert and crisis management. Field-tested and stable, the Confer Family of conferencing and instant collaboration products are installed in thousands of military, public safety and business locations internationally.</p>
<p>One Touch Control</p>	<p>Touch screen capability provides one touch initiation, and lets you control which team members you wish to include for a specific event. 2005/2006 ALERT Plus release provides faster, more sophisticated processing to replace outdated 1980's analog solutions. Graphic User Interface lets you view current status of remote phones.</p>
<p>Flexibility</p>	<p>Easy to cost justify; peripherals provide multiple functions for weather alerts, security notification and crisis management.</p>
<p>Powerful Add-Ons:</p>	<p>Panic Button: provides immediate initiation and one-way microphone for front-line personnel at hotel, retail, school, banking or government sites. Radio Interface: 600 ohm or single-ended audio interface connects to one or multiple frequencies. Remote Security Sensors: programs incoming sensor lines to trigger Crash Mode. Remote Contact Closure: Crash Mode activates overhead doors, lights and power latching relays. Strobe OR Strobe + Siren: initiates visual alert with power backup and/or 125dB alarm and flash. Emergency Crash Telephones: with push-to-talk handset. Remote Public Address or Listen-Only: lets you broadcast emergency orders, locate key personnel or update event progress.</p>
<p>Other Forum Solutions:</p>	<p>The Confer III is a value-based meet-me conference system with optional intranet GUI controls (ask for ConferWeb). For regional or international emergency notification, ask about the Blast-911 and Enhanced Firebar servers. Call 972-680-0700 or visit www.forum-com.com.</p>
