

# **Alert III Crash System Basic System Overview & Training**

## Alert III Emergency Conference System

- PCAS / SCN - Primary /Secondary Airfield Crash Net
- Instant Emergency Conferencing for First Responders
- Proven Design for Performance and Reliability
- Meets DOD / AFI and FAA Requirements for Airfield Communications

## Alert III Overview

RS232 Interface - 4 wire

### Standalone, independent system.

- No connection to LAN / WAN
- With local UPS, impervious to power surges or outages - line powered.

Loop start analog signalling - FXS/FXO-2 wire.

#### System Console: PC GUI

- Visual Status of all elements.
- Basic Functional controls.
- Configuration changes.
- Not vital for operation.
- All in one PC w Forum

Software

#### System chassis:

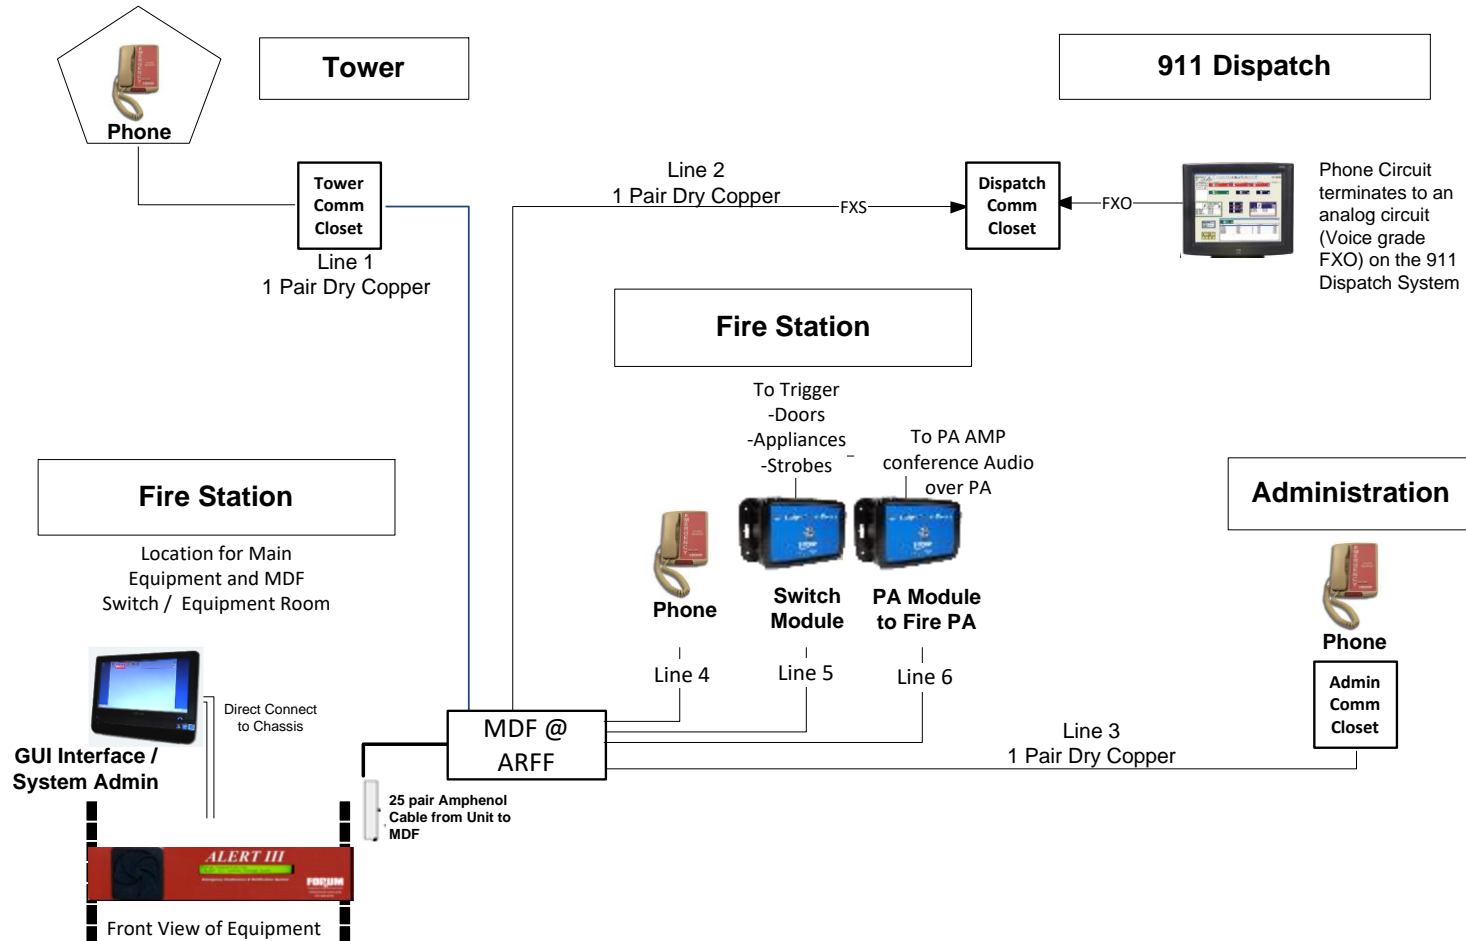

- Fully integrated total system functionality.
- Conference control.
- Ringing stations.

#### Telephones:

- Analog, line powered station sets.
- Push to Talk Handsets
- Visual LED ringing indicator.
- Handset volume control.
- HI /LOW ringer control.

## User Interface (GUI) provides Visual Indication of System Status

- When a designated Blast Initiator phone is taken off hook, a crash blast of all “armed” lines is performed.
- The Touch Screen User Interface indicates when a line is ringing and answered.
- Clear Conference Audio is established immediately, with no ring tones heard while participants join the call.

Each Agency can be in one of four states:

**Armed:** station will ring

**Armed and Initiator:** station will initiate a blast and ring if other station initiates.

**Initiator Only:** station will initiate a blast, but will NOT ring if other station initiates.

e.g., ATC Tower for Primary.

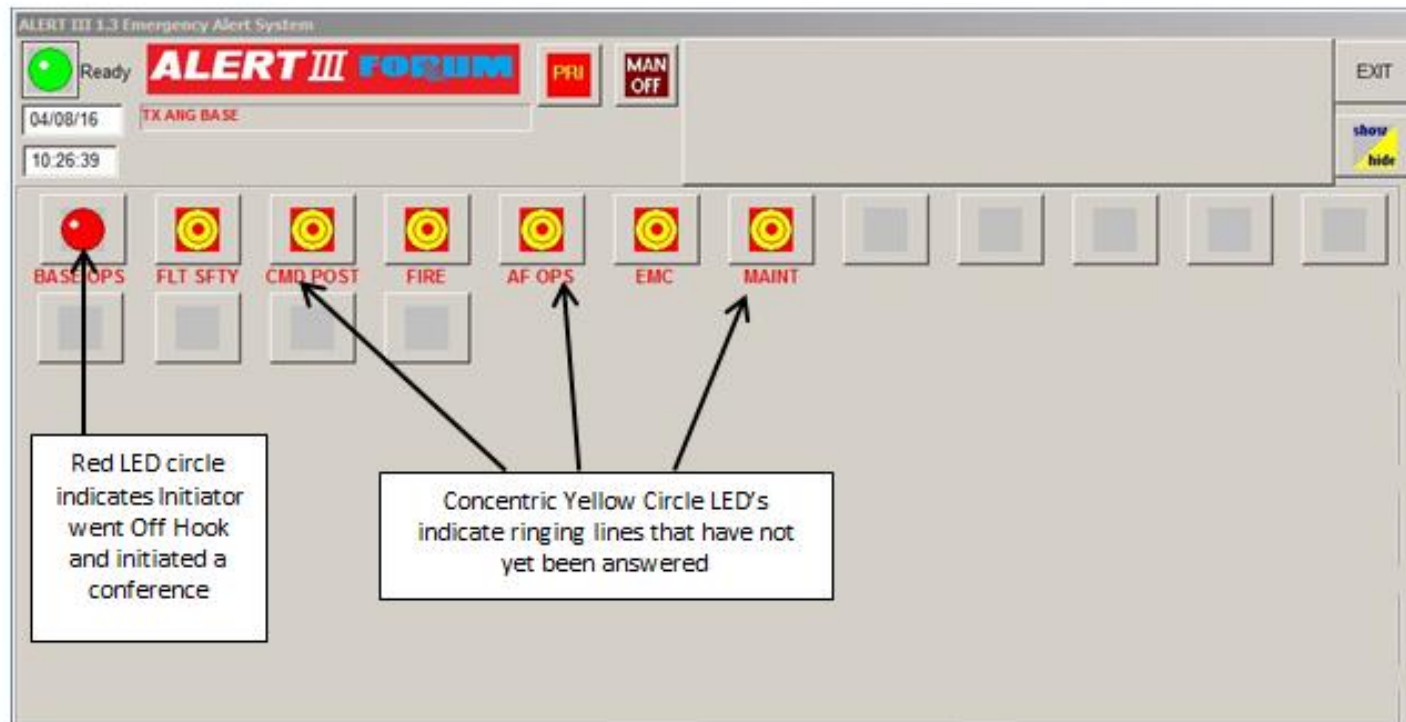

**Unarmed:** not active

## Dual User Interfaces Support Multiple Control Points

- Fully Functional (Full Duplex) System User Interfaces
- Support for Primary / Secondary Crash Applications
- Customizable Ring Cadence for Different Initiators
  - Indicates Who Triggered the Crash Conference
  - Supports Notification of Multiple Emergency Types

## Alert III Emergency Conference System

### Specialized Telephone Instruments

- Push to talk handset provides positive audio control while minimizing interference from noisy environments.
- Flashing red LED provides visual ringing indication.
- Two ringing volumes, low / high. Switch selectable on back of set.
- On Hook audio volume, adjustment bar on faceplate.
- Positive retention handset prevents accidental activation.
- Customizable faceplate color and emblem.

### Push to Talk Handsets

Push *and* Hold the button to speak,  
Release the button to listen.

### Service and Support

Forum provides a ***One Year (1) Remote Support Agreement***, effective from date of acceptance, 8 to 32 port chassis. Forum will perform remote diagnostics and provide advance replacement of components, if required.

Forum offers a complete program of service and support options for our customers, from additional training and certifications to remote diagnostics, documentation and support. For assistance just call or email.

For Technical Phone Support, contact us as shown below:

Monday - Friday (8:30 am to 5:30 pm CST)

Alert III Products Support Line: 972-619-8585
