

Training Programs

Consortium™ Conference System

Overview

Forum Communications offers System Administration and “Train-the-Trainer” classes with installation of your Consortium Conference System. Consortium Maintenance Training and Certification provides hands-on diagnostic and testing skills for your IT staff.

Forum’s training classes let you maximize system knowledge, and allow your on-site experts to provide first tier troubleshooting. Courses can be customized to include Maintenance Training and System Administration, and can be targeted for new staff or as a refresher course.

System certification allows your staff to install system enhancements and/or expansions.

System Administrator Training

- System Introduction
- How to set up a conference
- Setting system defaults
- Setting advanced conference defaults
- Conference details and advanced options
- System security
- Importing/upgrading Participant data base
- Assigning Operator privileges
- Touch Tone commands
- Managing recorded conferences
- Reporting functions
- Customizing voice messages
- Backup procedures
- Training reservation staff and operators
- User training

BENEFITS
