Virtual Rooms
Recurring Calls
Quick Conference
WebMeet Data Sharing

Forum's Consortium II is changing what people think about conferencing.

Feature Rich

The Consortium II is a powerful conferencing server that can support multiple conference types, Meet Me, Recurring calls or Quick Conferences. Consortium II provides superior flexibility to control and administer the conferences with it's user friendly interface. Superb conference quality offers flawless sound clarity as if the participants were meeting face-to-face. The Integrated Outlook scheduling capability streamlines scheduling and lets anyone schedule a conference.

Easy to Use

The Consortium II showcases a mixture of high tech, advanced features with our leading edge solutions centered server and software. The user has easy one touch access and can download recorded MP3 conferences for Podcasting. Forum's Consortium II is taking Conferencing to the next level and providing capabilities that are easy to manage and easy to use.

Valuable for your Enterprise

The Consortium II includes software that is accessible from any PC through a web browser. It has the integrated Outlook scheduler that lets anyone schedule a conference. Forum wants the meeting to be a face to face experience for the end user. With rich features, security and affordability, the Consortium II is the right choice for your business.

CONSORTIUM II
